

## C. N. P. Lawn Tennis Tournament Completed

The handover games of the Crow's Nest Pass Lawn Tennis Association tournament, necessitated by a rainy Dominion Day, have been finally completed. The semi finals and finals, on the whole, although arousing a great deal of interest in the Pass and attracting a considerable number of spectators, were not productive of as good tennis as the games played on the regular tournament dates.

In the men's singles, Rae beat Pinkney and Houbregts won from Barne in the semi-finals. In the finals, Rae and Houbregts played "safe" all the way, neither taking a chance of any sort. Rae won the match and Corbin cup 4-6, 6-2, 6-3, 6-2.

In the ladies' doubles between Mrs. Rose and Mrs. Cruikshank of Hillebert and Mrs. Kerr and Miss Marquis of Blairmore West End each took a set and the deciding set was a ding-dong battle all the way, first one leading then the other. Some interesting tennis was the result with Hillebert winning the Hillebert trophy 6-3, 4-6, 10-8.

In the ladies singles Mrs. Purvis of Coleman took the first set from Mrs. Kerr of Blairmore 6-0. Mrs. Kerr took the next 6-0 and wound up with the third to her credit 6-2, for the International cup.

The mixed doubles went to Mrs. Purvis and Barnes of Coleman, winning from Miss Marquis and Hastyshy of Blairmore, 7-5, 6-3. Coleman also won the Blairmore cup for men's doubles, McLeod and Hastyshy taking this event after spirited play from the first round through to the finals.

At the conclusion of play Friday evening last, Mr. Luke Lindoe, president of the Coleman club, presented the trophies to the winners. Mr. Lindoe spoke of the most auspicious start made by the new association in staging such a successful tournament during the first year of its existence. He remarked on the great interest taken by the members of all clubs in the event and said he hoped every effort would be made to encourage and help the younger players.

It is evident from the form shown throughout the play, that these should be quite a number of entries from the Pass association clubs in the Lethbridge tournament at the end of this month.

## Pass Up Coleman on Red Trail Literature

The official road map and guide, issued by the Red Trail Association, copies of which recently arrived in town for distribution, disclose a very serious and unexplainable error on the part of those responsible for compiling the information contained in this literature, when Coleman, one of the largest and most important points on this highway, the home of one of the directors of the Association, is not listed amongst those centres having either hotel or garage facilities.

It would indeed be interesting to know just what excuse those responsible for issuing the map in question have to offer for this glaring oversight, and what steps they propose to take to rectify same.

## Hunting Party Coming

Alberta is to be visited this fall by a distinguished hunting party, arranged by Captain Curtis, one of the editors of the Field and Stream, of New York. The party will spend 40 days hunting big game in the province.

## Meeting to "Discuss" Swimming Pool—Mayor to "Cuss" The Journal

According to a notice pinned up in the post office, signed by the Mayor, a public meeting is being held, Thursday evening for the purpose of discussing the matter of a swimming pool. Those who are really interested in this important question will need to be on the watch that this swimming pool is not "talked" to death before it gets started. Money talks the only language Coleman's swimming pool can understand at its present stage.

We also notice His Worship is to publicly hold forth on his Burns-Journal Controversy, and issues a special invitation to the writer to be present. Just what relation the one bears to the other is hard to conceive. However, unfortunately for us, and probably fortunate for the Mayor, the editor will be unable to attend as he is leaving Friday morning for a vacation. However, if the Mayor decides to obey the law this year and holds a ratepayers' meeting when the snow is covering the ground and things in general are cool, we hope to be present and listen to what he has to say.

## Miner's Spine Badly Injured by Fall of Rock

A very serious and lamentable accident happened to Mr. Duncan, a miner employed in the McGillivray mine on Friday last, when a fall of rock from the coal face caught the unfortunate man and fractured his spine. Medical attention was immediately secured and his injuries were found to be such that he was taken to Calgary on the night passenger.

The injured man has a wife and six children at Nordège, and had been working in Coleman for less than a week when the accident occurred, although he is a man of over 42 years experience in mine work.

## Little Girls Molested in Park

Several instances have recently been brought to The Journal's attention where little girls have been molested by men in town.

One such incident occurred in the Park on Tuesday afternoon of this week, when a man accused of three little girls about 9 years of age, making indecent proposals to them and otherwise acting in an objectionable manner. Chief Houghton was notified and is working on the case.

Every effort should be made to apprehend individuals of this nature and stiff sentences, coupled with the lash, should be meted out to beasts of this type.

## British Miners Benefit

Another collection in aid of the striking miners in the Old Country was taken outside the Bank on Saturday, and a nice sum was realized to help the British miners in their fight for a decent living wage.

## TOWN OF COLEMAN NOTICE

The Town Council has decided to extend the 10 per cent Rebate on Taxes for 1926, until the 9th day of August, at 5 p. m. Taxes not paid on or before this date must be paid in full.

JAMES FORD,  
Secretary-Treasurer

## Personal and Local

Mr. and Mrs. J. Scott left Thursday morning of last week by auto for a month's holiday at Seattle where they will visit their son and daughter-in-law, Mr. and Mrs. C. Scott.

The L. O. L. and L. O. B. A., fittingly celebrated the glorious 12th with a picnic held on the football grounds Monday afternoon.

Mrs. George Kellock and family, of Carbondale, left recently for the Coast, where they will spend a vacation.

Mr. and Mrs. R. Tennant, of Carbon, B. C., were the guests of Mr. and Mrs. H. Gate last week.

Mr. and Mrs. J. Houghton and Miss Hilda, returned on Monday's passenger from a week's holiday at Calgary, where they took in the stampede.

Mr. J. Yates caught a nice 2 lb. speckled trout at Crow's Nest lake on Sunday last.

Mr. and Mrs. J. Hadfield, 6th street, are leaving next week to spend a holiday at their former home in Nova Scotia.

Mrs. M. E. Devine and Mrs. D. E. MacDonald, of Lethbridge, mother and sister of Mr. C. J. Devine, 6th street, arrived last Thursday and are spending a vacation with Mr. and Mrs. Devine.

Mr. and Mrs. E. F. Gare and children are leaving on Friday morning for a month's holiday to be spent camping at Kaslo on the Kootenay Lake.

## June Homesteads

A total of 120 homesteads were taken up in northern Alberta in June, according to registrations at the Dominion Land Office in Edmonton.

Dr. and Mrs. R. M. Kines returned to Coleman on Saturday last from their wedding trip.

Miss Delphine Calahan, of Pincher Creek, is the guest of Miss Ethel Wilson, 7th street.

Mrs. C. J. Devine, Sixth street, left last week for Calgary to spend a holiday with her sister.

## Got Some Beautiful Speckled Trout

The editor of The Journal has to thank Mr. A. E. Knowles for three nice trout received on Monday. Albert and Jeff Knowles accompanied by F. J. Lote, spent the week-end at the South Fork where they each secured their quota of fish. Some of their catch were real beauties, measuring about 22 inches and weighing two pounds.

## Record Crowds at Stampede

Record crowds attended the Stampede at Calgary last week. Among prominent outside writers present were Mrs. Piper, Brooklyn Eagle; Frazier Hunt, Associate Editor, Cosmopolitan Magazine and George Lait, of the Hearst Syndicate, son of Jack Lait the author.

About 50,000 trout fry arrived from Banff hatchery on Saturday morning last and were placed in the Old Man river tributary streams and the lake West of Coleman.

Albert Monty, of Detroit, Mich., a former resident of Coleman, has been spending three weeks visiting here, returned to Detroit to resume his position with the Hudson Motor Car Co. of that city.

## Gets 3rd Place in Race

Clarence Groat, of West Coleman secured 3rd place in the Herald walking race at Calgary on Saturday last. Owing to the extreme heat many of the contestants dropped out long before the finish. Mr. Groat deserves much credit for the splendid showing he made under such trying weather conditions.

## Personal and Local

Mr. Geo. Pattinson has recently donated a fine silver cup to the Coleman Golf Club which will go to the winner of the match play now in progress on the local links. This splendid trophy is now on display in Powell's jewelry store window.

The Town Band are giving an open air concert at Crow's Nest lake at 6.30 p. m. on Sunday, 18th of July.

Mr. and Mrs. Edgar Williams and son, Ronnie, of Ponoka, Alta., are the guests of Mr. and Mrs. J. C. Cox, West Coleman.

Mr. and Mrs. C. Shaw are rejoicing on the arrival of a baby girl at their home on Tuesday, July 6th.

The Salvation Army held a very enjoyable picnic at Crow's Nest lake on Wednesday of this week.

Mr. A. Dodd, a resident of Hillcrest for over 20 years, was found dead at his home on Monday, the result of a stroke. Deceased was 72 years of age and one of the pioneers of Alberta, being one of the first white settlers in the city of Lethbridge.

## One of Nature's Beauty Spots

Those persons owning cars who would appreciate a swim in a lake of warm temperature could not do better than visit Lee Lake. This beauty spot is situated 4 miles south of Burnis and makes an ideal spot for a picnic or camp. Parties from Lethbridge, Bellevue, Coleman and places as far as Taber and New Laxton are now encamped there. A fine spring of ice cold sulphur water is on the grounds and should be visited by all who go to the lake for its medicinal properties. Mr. Parker, the owner, is a well known person in the Pass and he is pleased to supply farm produce to campers for their convenience.

Hillebert football team won from Coor Creek on Saturday last by a score of 4-1 in a C. N. P. league game.

A meeting of the Native Sons of Canada will be held in the L. O. O. F. Hall, Coleman, on Friday evening, July 16th. All Canadians welcome. Mr. E. R. J. Forester, secretary of the Native Sons of Canada, Lethbridge; Rev. W. H. Irwin, of Macleod, and Rev. Father McCormick, of Coleman, will be present and address the gathering.

Mr. W. S. Purvis is taking part in the Southern Alberta Tennis Tournament to be held at Lethbridge shortly, as a representative from the Coleman Club.

Rev. Currie in Charge at St. Alban's Church, August 1st

The Bishop of Calgary has appointed the Rev. A. D. Currie to the charge of St. Alban's Church, Coleman, as from August 1st.

The Rev. H. Laurence Nobbs, who is spending a short vacation at Lee Lakes has not been offered or accepted the post of Rector of Drumheller. He has resigned from the charge here as from the end of July.

Mrs. Nobbs is spending a short vacation at Raymond as the guest of Mrs. Higue.

## Oddfellows Picnic Largely Attended

There was a big turnout of Oddfellows, Rebekahs and members of their families at the picnic held west of Sentinel on Sunday afternoon last. The day was ideal, if not, for an occasion of this nature, and the large crowd thoroughly enjoyed the outing. There was a wealth of good things to eat and drink, besides plenty of amusement for both young and old in the various games played during the afternoon and evening.

## D. Davies Congratulates International First Aid Team

The following letter was received last week by Mr. O. E. S. Whiteside from Mr. D. Davies, of Robb, Alta., for many years a resident of Coleman and the "father" of First Aid work here: "To Mr. Davies' efforts along this line of endeavor is due the splendid showing made this year, and in the past, by teams representing Coleman in contests of this nature. His letter to Mr. Whiteside goes to prove that his heart is still in the work and his interest in Coleman's representatives is very much alive:—

Robb, P. O., July 6th, 1926  
O. E. S. Whiteside, Esq.,  
General Manager,  
I. C. & C. Co., Ltd.,  
Coleman, Alta.

Dear Mr. Whiteside:—

Allow me to congratulate you and the International First Aid team on again winning the Coderre Cup, emblematic of the Champion Mining Team of Canada, for first aid to the injured.

Kind regards,  
Yours sincerely,  
D. Davies.

## Money Talks Best For Swimming Pool

The town council of Blairmore our neighboring mining centre similar to Coleman, in constructing a swimming pool with money from the town treasury. Is it not about time that those in authority over the purse strings of the Coleman treasury dug up a little money to add to what the citizens at large have voluntarily contributed, in order that Coleman can have a swimming pool before another century rolls around?

There have been many less worthy causes receive assistance from the people's tax money in the past, and some will likely receive still more in the future. Money and action is what is required from those in authority in Municipal affairs. Talk and pining the lack is not getting Coleman a swimming pool.

If there is no other solution, a \$3,500 swimming pool in operation, is better than a visionary \$8,000 one.

## WEDDING

BROCKLEHURST—BARRELL

An event of considerable interest to Coleman people took place at the Westbourne Baptist Church, Calgary, on Monday of this week, when Sybil, the second daughter of Mr. and Mrs. C. B. Barrell, of Calgary, became the bride of Mr. Albert Brocklehurst, of Coleman, only son of Mr. and Mrs. S. Brocklehurst, of Calgary.

The bride was given away by her father and was attended by Miss Jeanne Derumeau, while Mr. T. Holstead, of Coleman, was best man. Rev. E. Hannell performed the ceremony in the presence of a large number of invited guests. Mr. E. Campbell played the wedding march.

A reception was held at the "Tas Kettle Inn" at which some forty guests were present and enjoyed the splendid wedding supper. The young couple received many beautiful gifts from their many friends.

Mr. and Mrs. Brocklehurst expect to take up residence in Coleman some time next month. Mr. Brocklehurst is a member of the McGillivray Creek Coal & Coke Co.'s office staff, and his friends here will wish him and Mrs. Brocklehurst many years of happiness in their married life.

## Local Dog Wins Prizes at Calgary

Coleman hockey, football, First Aid teams and long distance runners and walkers have at various times placed this town on the map, but according to Journal records the lower animals have not heretofore shared in this glory.

However, last week at the Kennel Club Show at the Calgary exhibition, Sarcee Tam-o-Shanter, a young setter pup, owned by Mr. H. C. McBurney, of Coleman, won three honors and thus did his canine "bit" to put this town on the map of dogdom.

He secured 1st prize in the Gordon setter class for puppies, 1st prize in winners of breed and 2nd prize for best setter of any breed in the show.

## He Took Them In— They Took His Money

Mr. John Johnson, 2nd street East, is less wealthy by about sixty-five dollars on account of playing the part of the Good Samaritan to some strangers on July 1st.

Mr. Johnson generously allowed a couple of strangers to stay the night at his residence on July 1st. They awoke early in the morning and departed before their host got up with a roll of bills taken from Mr. Johnson's pocket.

So far Mr. Johnson has not located the parties or his money.

## Millinery Demonstration.

Last Friday, Saturday, and Monday of this week, were busy days for some thirteen ladies of Coleman who participated in the Millinery Demonstration held in the club room of St. Paul's church under the auspices of the local branch of the W. I.

Mrs. Davidson, of Edmonton, was the instructor in charge of the class, and due to her ability and the untiring efforts of her pupils, thirteen lovely millinery creations are now ready to adorn those ladies who attended.

Messdames A. W. H. McLeod, W. Bosworth, and J. A. Price of the W. I., saw to it that all arrangements were made for the proper carrying out of the affair. At the conclusion of the demonstration on Monday afternoon, ice cream and cake were served to all those in attendance.

## 1926 Automobile Road Map Here

All Main, Secondary and Intermediate Trails Shown. Plainly

The 1926 edition of the Automobile Road Map of Alberta, Supplied by James W. Davidson, president of the Alberta Good Roads Association, as the most authentic and accurate yet made, is just off the press. It is published by the Western Canada Road Route Service Ltd., of Calgary.

A copy of this map has been received by The Journal and a perusal of it shows the great care and infinite work that was necessary in its preparation.

It is announced that the map will be placed on sale in most of the stationery stores and garages in Alberta or may be secured direct from the publishers.

This big map sells for seventy-five cents. It is valuable to anyone starting out on a motor trip and will be a stimulus to tourist traffic in the province.

# REUSE "is good COFFEE"

## Canada's Year Of Jubilee

The Dominion of Canada has entered upon its diamond jubilee year and on July first next year Canadians will celebrate in a fitting manner the sixtieth anniversary of Confederation.

It will be most timely and in every way appropriate if in the months intervening before that historic date all Canadian organizations make it the chief item in their programmes to study Canada, past, present and future, and to present facts to their members and the people generally relative to the history, the development, the resources, and the boundless possibilities of the country.

Canada's diamond jubilee year presents a glorious opportunity to all our organizations to make this a "Canada First" year. Would it not be a fine thing if, say once a month, every Canadian Club, Rotary Club, Kiwanis Club, Lions, G. R. O., and other service organizations, every Homemakers and Community Club, the Canadian Legion, all fraternal bodies, I.O.O.F., Y.M.C.A., Y.W.C.A., United Farmers, churches and schools devoted a meeting to some one phase of Canadian life, history or development.

Indeed, why should the Departments of Education of the several Provinces not arrange a special programme of studies in regard to Canada, all devoting to make our people better informed regarding the constitutional development of government in Canada, our position in the Empire, in the League of Nations, and better acquainted with the principles and procedure of government in Canada, the administration and enforcement of law, in a word, the growth and development of Canada from the status of a Crown Colony to a self-governing nation within the Empire and with full nationhood among the nations in the League of Nations?

This jubilee year presents a golden opportunity for the presentation of historical plays and pageants designed not merely to entertain and bring out the artistic qualities of our people, in their preparation and presentation, but also to instruct in a most effective way.

The twin Provinces of Alberta and Saskatchewan are this year celebrating their coming of age as autonomous provinces, and advantage is being taken of this occasion to depict in various ways the growth and development which has marked the past two decades. In a special way these facts are being presented by floats in parades in connection with our summer exhibitions. But why should plans not now be made, not only in the West, but throughout the length and breadth of the Dominion, to present at every exhibition next year through means of floats, parades and pageants the Canada of 1871 as contrasted with the Canada of 1927?

Canadians, it is true, are not much given to this sort of thing. We are a reserved people and hate to display our feelings and emotions. We are not given to flag waving. But surely all can unite in making the diamond jubilee year of Confederation an exception. We have hundreds of thousands of citizens, born in other lands and under other flags, who have chosen Canada as the land of their adoption. This jubilee year should be so utilized so to acquaint them with Canada's past history and achievements, to instill in their hearts and minds a real pride in Canada, to enshrine them with a desire to be Canadians in every true sense and meaning of the name.

If for one solid twelve month the people of this Dominion thought, talked and preached Canada, the cumulative effect in the arousing and development of a real national spirit would be tremendous. It would operate to break down old barriers of race and creed, would wipe out purely sectional considerations, jealousies and suspicions, and create an entirely new spirit throughout the land.

Canada is worthy of the very best that her people can give to it. Let us unite, therefore, in giving to Canada a year of unutilized loyalty, considered thought, and unselfish devotion—a year of study of Canada, a year of service in endeavoring to arrive at a fuller understanding of her problems and needs, a year of unremitting effort to solve those problems and meet those needs.

## Objectionable Motor Signs

Move Laid in New Jersey to Revoke Licenses of Motorists With

Offensive Placards

Commissioner Dill, of the New Jersey motor vehicle department, said he will attempt to revoke licenses of motorists who display offensive signs beneath registration placards.

Commissioner Dill said he believed this step was the only possible one to abate the evil. He added it was wrong to offend the public with placards on which profanity even was blazoned.

One of the signs to which he objected particularly reads: "If you can read this you are too damn dumb." Fish fossils in oil well.

In drilling an oil well recently near Medicine Hat, a stratum of fish and shell fossils was found. The fossils were struck at a depth of 3,720 feet, and it was apparent that they were being washed into the well. Other finds were reported. Iron pyrites and talcum were found at varying depths; the talcum rock being about 750 feet down.

## Okanagan Lake Service

New C.N.R. Steamship Service On

Okanagan Lake

Announcement is made of the opening by the Canadian National Railway of a steamship service between Kelowna and Penticton on the Okanagan Lake. A new steamship, the Penticton, will make two trips each way daily, except Sunday, starting July 15. This extends the passenger service which was put into operation with the completion some months ago of the new Canadian National line between Kamloops and Kelowna and gives a complete service from Penticton connecting with the Continental Limited east and west from Kamloops.

Australia Overrun With Cactus Within a few short years Queensland, Australia, has become practically overrun with cactus. Some settler or traveller brought a few sprigs of the plant known as the prickly pear, which spread before the farmers took any notice of it. Now the cactus has spread over much of the arable land of the province, which is 67,000 miles square.

## Moscow Shirks Responsibility

Could Have Prevented Financial Help Being Sent to British Strikers

Moscow obviously is lying when it tells Great Britain that it is unable to prohibit Russia "radio unions" from sending money abroad to aid trades unions in other countries and disclaim all responsibility for the financial help sent from Russia to British strikers while the general strike was on, and afterward, upon refusal of the managers of the strike to accept it, transferred to the miners' federation.

If, as the Soviet outfit asserts, there is no prohibition in its domain "against the remittance of money abroad, but only the obligation to obtain a permit for such remittance," that prohibition is lacking because the Moscow chiefs for their own reasons have purposely let down the bars, and the very statement that a permit is necessary is an admission that it lies within the power of Bolshevik Government to put them up again at any time, and in any particular instance, as it pleases.—Detroit Free Press.

## 2 Years' Backache

### Subdued by "Nervine"

"Backache was the bane of my life, and for two years I was no lame to be unfit for work," writes E. S. Stinson, from Georgetown. "While in South Bros' Drug Store I heard of Nervine being a wonderful pain-destructor, so I decided to try Nervine. Thanks to Nervine, my two years' backache was rubbed away, and today I am perfectly well."

All those who suffer from weak, aching backs, those whose muscles are stiff, whose joints are sore, and who feel Nervine—the liniment that never fails. 35c at all dealers.

## GIRLHOOD DANGERS

Come Through a Weakening of the Blood—A Tonic is Needed

In their early teens it is quite common for girls to outgrow their strength, and mothers should carefully watch the health of their daughters at this time. If a girl's strength is sapped by rapid growth, if her menstruation develops, the first signs may be noticed in her nervousness, loss of appetite, and headache. The face grows pale, breathlessness and palpitation become apparent, with low spirits and depression.

Neglected anemias often leads to a decline, but if you are that your daughter's blood is enriched, there need be no cause for anxiety. The finest blood-builder ever discovered is Dr. Williams' Pink Pills. They will build up your girl's health and ensure for her the health and happiness of her life. In proof of this, Mrs. George Johnston, of the Harbor, N.B., says: "I think Dr. Williams' Pink Pills are a wonderful medicine. My daughter, Margaret, was in such a badly run down condition that we feared she would never have a chance. Her face was pale, the least exertion would leave her breathless and she suffered from heartburn. She had no appetite and lost a lot in weight. Up to the time we began giving her Dr. Williams' Pink Pills, treatment had helped her. But thanks to the use of this wonderful medicine she is again well and strong, showing no signs of the trouble that had so weakened her."

In all troubles due to weak, watery blood, Dr. Williams' Pink Pills will give a reliable remedy. Sold by all medicine dealers. Send for a free 50 cent box by The Dr. Williams Medicine Co., Brockville, Ont.

## Invited To Palace

Spanish Workman Did Not Recognize King Who Gave Him Lift

Here is another story to add to the many good ones told about King Alfonso of Spain. Driving recently just outside Madrid, the king's car came to a standstill, and a minor adjustment had to be made by the chauffeur. At that moment a tired-looking workman, who was walking in the same direction, came up, and, not recognizing the king, asked him for a lift as far as Madrid. The king, with a smile, told him to jump up, and the car conveyed him swiftly to his humble dwelling in the slums of Madrid. Then the king shook hands with the amazed workman, who had begun to thank him. "Goodbye old man," said the king. "Have a good rest, and if you want anything at any time, come and see me at the palace."

## More Bicycles Than Cars

Every sixth person in France has a bicycle, the total number being about 6,000,000. There are ten times as many bicycles in the country as automobiles.

Minard's Liniment for Bore Feet

W. N. U. 1637

STANDARD OIL CO. NEW JERSEY

## Wheat Pool A Huge Success

Chairman of Saskatchewan Pool Declares It To Be A Bigger Success Than Ever Dreamed Of

At a wheat pool meeting held at Melville, Sask., recently, and attended by over three hundred farmers, A. J. McPhail, chairman of the Saskatchewan Wheat Pool, stated that a determined effort would be made to increase the pool acreage by another million this season.

"The Pool," said Mr. McPhail, "is a far bigger success than any of us ever dreamed of. It will have a great influence in stabilizing prices; it is a great unifying influence uniting the farmers of the three western provinces; it is the greatest business that agriculture has ever engaged in and no man may see what it may grow to. It has given the farmer a standing which he never had before and its success has shown that the farmers can stick together." It was not and never has been the intention of the organization to control wheat with the object of artificially raising the price. To do so, he said, would inevitably defeat its own object, for in that case wheat would be grown to a large extent and thus greatly increase the supply.

## Japs Interested In C.N.R. Radio

Travel Over System to Secure Painters On How Plan Works

For the purpose of investigating the progress of radio in Canada, particularly its workings in the world of transportation as developed by the Canadian National Railway, Kikoku Suzuki, of Tokyo, Japan, and K. Togasaki, of San Francisco, are travelling over the system on radio-equipped trains. According to Mr. Suzuki, the Japanese Government railways are now experimenting in the establishing of radio on their trains, and they are anxious to secure an insight into the conditions under which radio-equipped trains operate over Canadian National lines.

## Novel Racing Contest

Aeroplane Travels Faster Than the Fastest Pigeon

An aeroplane has proved 23½ miles an hour faster than the fastest pigeon in a race between two planes and 50 homing pigeons.

The novel contest was held between the Hammondsport and Auburn, course of the straight line course of 50 miles while the planes, one of which was forced down, were scheduled to fly 42 miles.

Despite the 12 miles handicap the winning plane finished three minutes ahead of the first pigeon, completing the longer distance in 45 minutes, or 82½ miles an hour.

A compound has been invented which counteracts the effectiveness of poisonous gas.

If you find that you are being driven to despair, get out and walk.

For COLIC AND CRAMPS PAINS IN THE STOMACH There's Nothing Equals

It has been in use for over 80 years; its action is pleasant, rapid, reliable and effective, and relief comes promptly.

The genuine is put up only by The W. H. Milburn Co., Limited, Toronto, Ont.

## Wireless Phones For Aeroplane Passengers

Experiments Between Pilot & Ground Prove Successful

Passengers on the huge air liners of the German Air Service, which on some planes furnish movies and phonograph music for the diversion of air travellers, will soon be able to pick up a wireless telephone receiver and, despite the roar of three 120-horsepower motors, talk with any telephone subscriber in any large city of Germany.

Wireless telephone experiments between pilots on two of the night air routes and landing fields have proved successful. The pilot circling over Stockholm in a thunderstorm talked with Templehof field in Berlin for five minutes.

The Air Service directorate announces that wireless telephones will be placed at passengers' disposal prior to the routes between Berlin, Paris, Berlin-Stettin-Stockholm and Berlin-Danzig-Königsberg.

The phones operate in the same manner as the wireless telephone apparatus on trains between Berlin and Hamburg.

## Girl Receives Bronze Medal

Heroine of Lighthouse Rewarded By Committee of Lloyds

The committee of Lloyds has awarded the Lloyds bronze medal for meritorious service to Ethel Laughton, 15-year-old daughter of the keeper of St. Helen's Light, Loughborough, Leicestershire. The medal is given her in recognition of her endurance in keeping the lighthouse lamp working for three days during a gale last March. The girl was left on the lighthouse while her parents made a dash for shore to replenish the sadly diminished provisions. They could not get back owing to the gale. For three days and nights the girl was alone with only her pet dog for company. Undaunted, she kept the light going, climbing twenty feet up a steel ladder at regular intervals to attend to the oil burning lamp. All the food she had was a pound of bread, and when her parents returned she was quite well and cheerful.

The Lloyds bronze medal has not been previously awarded to a woman, but the silver medal was conferred upon the wife of a ship's captain in 1897.

## Use Bad Language

Modern Mother Responsible For Great Deal of Loose Speech

Bad language of the modern mother is responsible for a great deal of loose speech among school girls, Miss Mary Morrison, principal of the Francis Land School for Girls, told the annual conference of the headmistresses' association in London.

"For years we have made allowances for our father's 'strong language,'" Miss Morrison asserted, "but now mother is nearly as bad, and it is having a serious effect on the girl's speech among themselves. This is all a part of the so-called 'free freedom'."

## Drives Asthma Like Magic

The immediate help from Dr. J. D. Kellogg's Asthma Remedy seems like magic. Nevertheless it is only a natural remedy used in a natural way. The medicine vapor, reaching the lungs, brushes aside the trouble and causes a cure. For the relief it is sold by dealers throughout the land.

## Population and War

Militarists in all countries demand an increasing population. In order that an unfailing supply of recruits may ensure the national safety in the next war; but then they also hold that wars are inevitable owing to the pressure of expanding populations.—London Spectator.

The cheapness of Mother Graves' Worm Exterminator puts it within reach of all, and it can be got at any drugstore.

## An Unexpected Sequel

Man Failing to Carry Out Death Pact

Condemned For Murder. A death pact drama at Southport had an unexpected sequel. The young man aged 18 and his sweetheart of the same age agreed to commit suicide together. The girl died. The man failed to make good his share of the pact and as a result the court has condemned him to death for murder. The law holds that if two persons agree to commit suicide, and, in consequence, one of them dies, the survivor is guilty of murder.

## Organ Hundred Years Old

A bamboo organ, built into the church of La Pinna, Manila, more than 100 years ago by the Augustinians, still gives sweet and mellow tones. The bamboo was cut from a jungle near the church. The organ was twice damaged by earthquake and typhoon.

Minard's Liniment for Rheumatism

It doesn't take much to keep you in trim. Nature only asks a little help.

Wrigley's, after every meal, benefits teeth, breath, appetite and digestion.

## New Type Of Bandit

Confidence Man in England Uses Crossword Puzzle As Lure

Crossword puzzle bandits are latest thugs in British crookdom. Even the Englishman's reserve cannot withstand the desire for advice in the search for words to fill the crossword puzzle squares. Hotel lounges are the favorite haunts of crooks who walk the brawls over a rare Australian bird in three letters, and then lean over to a prosperous agent from the country to ask for aid. Sooner or later the conversation turns to get-rich-quick schemes.

It is on the trail of two crossword puzzle tricksters who posed as gentlemen farmers and separated a real dirt farmer from Aylesbury from his bank roll. The confidence men are described as suave and well-spoken but poor spellers.

## Powerful Medicine.

The healing properties in six essential oils are concentrated in every bottle of Dr. Thomas' Electric Oil, forming one of the most powerful remedies ever offered to the use of man. Many can testify as to its power in allaying pain, and many more can testify that they owe their health to it. Its wonderful power is not expressed by the small price at which it sells.

He had just arrived from the old country and was not familiar with the use of the telephone, so he took down the receiver and demanded: "Aye want to talk to my wife."

The operator's voice came back sweetly, "Number, please."

"Oh," he replied, "she bane my second son."

Use Miller's Worm Powders and the battle against Worms is won. These powders correct the morbid conditions of the stomach which nourish worms, and these destructive parasites cannot exist after they come in contact with the medicine. The worms are speedily evacuated without their refuse from the bowels. Soundness is imparted to the organs and the health of the child steadily improves.

In a certain town in Italy the taxes are levied according to the weight of the taxpayer. The fat man is assumed to be prosperous and charged on his poundage.

The oldest bath in England is the famous Royal Barge built by King William in 1689.

## CLOSURE METHOD IS APPLIED IN HOUSE OF LORDS

London.—The final stages of the eight-hour mine bill were characterized by amazing scenes in both Houses of Parliament and demonstrations of a very unusual nature in the House of Lords.

The debate on the third reading in the Lords, which had been delayed by the government to bring pressure on the Yorkshire mine owners, had proceeded quietly in the afternoon. There are only four Labour peers, and they had strongly criticized the bill, arguing that the behaviour of these Yorkshire owners proved that the government was putting a forcible weapon into the mine owners' hands, and that from this viewpoint the bill ought to be amended.

Owing to these protests the debate was prolonged far beyond the hour when the illustrious Upper House is accustomed to adjourn, and the members displayed great impatience. Finally the Marquis of Salisbury, Lord Privy Seal and the leader of the house, declaring that prolongation of the debate was an abuse of privilege, moved closure.

This brought renewed protests from the opponents of the bill, while a crowd of Labourite commoners, listening to the debate from the bar of the house, shouted: "Four hours for you, eight for the miner!"

The lord high chancellor, Viscount Cave, presiding, supported the closure measure and ordered that the Labourites at the bar should be removed, which was done by attendants.

The closure motion was then put and carried, and the third reading carried without division. This is probably the first time closure was ever applied to debate in the House of Lords.

## Called Lady Astor A Liar

Fiercy Labourite in British House of Commons Had to Modify Statement

London.—Lady Astor was called a liar in the House of Commons. Jack Jones, fiery Labourite, called the term to the titled member during a session regarding West Ham Borough, which has been in hot water in connection with alleged spendthrift administration under Labour auspices.

Lady Astor, interrupting George Lansbury, Labourite, on a point of order, said: "As this is a matter of municipal corruption (loud Labour cries of "no, no"), it is in order for the honorable member to compare the doctored member with the doctored guardians which has been proved corrupt."

Jones leaped to his feet, shouting: "You are a liar." Taking another breath, he shouted into the quick silence which had fallen on the house, "You are a liar."

There was a buzz of talk and then cries of "withdraw."

The chairman called upon Jones to withdraw his statement on a point of order. Some minutes' cogitation the member said: "I apologize to the lady and withdraw, substituting the phrase 'terminological inexactitude.'"

There was a ripple of laughter, but Lady Astor did not laugh. Mr. Lansbury resumed his speech and asserted that Lady Astor was the most ignorant woman in the house with regard to social questions.

He added that for a wealthy woman to interfere with the discussion of matters connected with conditions of the poor was "disgraceful."

## Delicate Constitutional Issue

Lord Byn's Action Regarding Dissolution of Parliament to Be Discussed at Imperial Conference

London.—The Daily News' political correspondent states that Lord Byn's action in refusing dissolution to form Premier W. L. Mackenzie King will be brought up for discussion by one of the Dominion premiers at the imperial conference in October.

A delicate constitutional issue will then arise, the correspondent states, and the position and powers of governors-general will be discussed with freedom for the first time of Dominion representatives themselves.

Toronto.—Interviewed here prior to his engagement to address the Conservative Businessmen's Club of Toronto, Hon. H. H. Stevens, acting minister of customs, heavily stressed that reduction of the tariff on motor cars brought in by the King Government would be allowed to remain in force by the Meighen Government.

## Visit Is Not Political

Lord Clarendon Coming to Canada on Land Settlement Business

London.—Owing to recent political developments at Ottawa, rumors were circulating that the visit to Canada of Lord Clarendon, under-secretary for the dominions, was a mission of political importance. An instance of these reports is the statement of the London editor of the Yorkshire Post, who says that, besides discussion of overseas settlement, "it is recognized that before Lord Willingdon goes to Rideau Hall, some should test the atmosphere" in Canada, particularly as regards the imperial conference and other such questions.

The Canadian Press was informed officially that Lord Clarendon will take up with the Canadian authorities only questions of land settlement. He sails on Saturday in company with T. C. MacNaughton, vice-chairman of the Overseas Settlement Board. They will make a tour of the country, but will not make public appearances.

Their visit was arranged some months ago, it is stated.

## Fear Famine In Mexico

Floods Have Completely Destroyed Most of Crop

Mexico City.—Rising flood waters threatened Mexico City with complete isolation and fear is expressed here that the nation may face famine or food shortage unless large quantities of food are imported to replace crops destroyed by the floods.

All railway trucks within 15 or 20 kilometers of the capital were covered with water and prospects that the train service between here and El Paso, Laredo and other interior points would have to be suspended.

In the state of Puebla a doubt about the Malinalco Mountain caused a torrent that dug a path 15 feet deep and a mile wide and destroyed over a mile of track near the station.

Apparently there has been complete destruction of crops throughout the Mexican plateau and the loss is estimated at from 10,000,000 to 15,000,000 pesos.

## Continue Customs Probe

Clean-up of Department of Customs and Excise Is Proceeding

Ottawa.—A clean-up of the department of customs and excise is now proceeding and will continue steadily according to Hon. H. H. Stevens, acting minister of that department, who was asked this afternoon the extent to which he was prepared to go in implementing the resolutions adopted by the house in its concluding days. It is believed that in a short time there will be the appointment of the judicial tribunal approved by the House of Commons, which will continue its work to be continued in the investigation into the administration of the department and ascertain the best means of making the enforcement of the law more effective.

## Prepare To Harvest Crop

Alberta Making Plans To Secure Supply of Harvest Help

Edmonton.—First move in the direction of harvest help supplies for the crop that is now growing has just been made by the Alberta government, which has completed a preliminary survey of the wheat belt for the purpose of ascertaining this year's acreage. The next step will be a conference with the United Farmers' Association in Winnipeg, in which Alberta will join with the other western provinces. This is set for July 16 and Walter Smithe, government commissioner of labor, will attend as Alberta representative.

Winnipeg Paper Offices Raided

Winnipeg.—After a raid on the O.R.T. Bulletin, a weekly publication conducting contests, it was charged with conducting a betting house and released on bail. Police have announced they will raid every week, papers running alleged betting competitions until they drive them out of business. Five other publications were raided during the past week.

Hon. Herbert Greenwood Weds Edmonton.—The marriage of Mrs. Marjorie Greenwood McCormack and the Hon. Herbert Greenwood, former prime minister of Alberta, was very quietly solemnized here, at the home of the bride's sister, Mrs. W. H. Bamford and Mr. Bamford, 1128-102 Ave. Only immediate relatives witnessed the ceremony, which was performed by the Rev. Dr. McQueen, of First Presbyterian Church.

Armed Guards Watch Exams Paris.—Any student who cheats at the Sorbonne will have his nerve with him. Members of the Republican Guard in full uniform and armed with bayonets watch examinations.

## Demands Dismissal Of British Officer

Canton Government Annoyed Over Alleged Threat To Close River

Canton.—The Canton Government has demanded the dismissal of the British naval officer here because he is alleged to have threatened to close the port of Wu Chow on the Sinking River, west of here, against Chinese shipping if pilots are not permitted to take British warships up the river to investigate the death recently of J. M. Phillips, a British subject. Phillips, British manager of the Atlantic Petroleum Company, was slain by bandits after being kidnapped.

## Abandons Work In Egypt

Sir Flinders Petrie Transfers Activities to Southern Palestine

London.—The famous Egyptologist, Sir Flinders Petrie, has decided to abandon research work in Egypt and transfer his archaeological activities to Southern Palestine, because of the "dog in the manger attitude of the Egyptian department under the French director Lacaze."

Sir Flinders is quoted by The Daily Express in an interview detailing hindrances imposed upon research work here as saying that other skilled excavators at Thebes have abandoned their work and are compelled to spend their time studying discoveries they had made two years ago.

## NO DEARTH OF CANDIDATES IN FEDERAL FIELD

Toronto.—Two former Liberal cabinet ministers from Ontario who were defeated in October, 1925, will be in the running at the approaching federal election, it was stated here.

George M. Gordon, former deputy speaker of the house and minister of immigration, will contest Peterboro, while Hon. Thomas A. Law, former minister of trade and commerce, will contest Renfrew.

It is expected that Right Hon. Mackenzie King will be offered the Liberal nomination in North York. Hon. C. D. Fry, former premier of Ontario is expected again to contest North Simcoe against W. A. Boyd, Conservative whip.

The Globe carries the following item in its news columns:

"Rumor has leaked out that Hon. John S. Martin, minister of agriculture, as third member of the Ontario cabinet, to whom a number of Premier Meighen's Ontario portfolios-in-the-making may be held out. Premier Meighen and Attorney-General Nicksie have already been named as possible selections for the federal ministry. Of the three Queen's Park men, Mr. Martin, it was believed in Conservative circles, would be the most likely to sever provincial connections for the larger theatre of activities at Ottawa."

Montreal.—"Le Devoir," organ of Henri Bourassa, former M.P. for La Belle, gives prominence to the following: "According to what can be learned today, one of the bombs which the Conservatives are preparing to launch is the re-entry of Sir Robert Borden, former premier of Canada from 1911 to 1913, into active politics in the order to assist Mr. Meighen with his counsel and direction during the forthcoming electoral campaign. Mr. Borden, within the past few weeks, has hastened to secure Sir Robert Borden's advice; the latter received him cordially and inspired certain of his decisions."

Two Dolls on Empress World Tour

Two of the tiniest passengers on board the Canadian Pacific liner Empress of Scotland were the dolls of Scotland and Georgia, a pair of marvellous dolls which amused the grown-ups. The dolls are a pair of marvellous dolls which amused the grown-ups. The dolls are a pair of marvellous dolls which amused the grown-ups. The dolls are a pair of marvellous dolls which amused the grown-ups.

## LABOR OPPOSES COAL PURCHASES FROM GERMANY

London.—Lively scenes were enacted in the House of Commons during consideration of the vote on an appropriation of £3,000,000 to pay coal bills abroad for fuel purchased by the government since the miners' dispute began.

The Labor members vigorously opposed buying more coal abroad; some of them did not notice votes about it, but nevertheless the vote carried 241 to 116.

John Wheatley, who was minister of health in the Labor cabinet, objected particularly to the government buying coal in Germany to beat the British miners, who responded to the call to defeat the Germans in 1914. The tilt in the house came upon the heels of an announcement in the House of Lords that the Yorkshire Coalowners had consented to offer the same ratio of wages and profits as other districts, thus removing a stumbling block and making it possible that the final stages of the eight-hour mines bill may be reached.

## Snowslide In B.C.

Occurred East of Revelstoke But No Casualties Reported

Vancouver.—Carrying hundreds of huge boulders weighing two or three tons each, a veritable river of water and big timbers poured across the Canadian Pacific Railway tracks near Lauretta, about 15 miles east of Revelstoke, B.C.

An engine and four cars of a work train were swept from the track to the banks of the mountain river, while another car is missing and it is believed to have been buried under the avalanche. It is believed no one was in the car.

Thousands of tons of wet snow moved down the mountainside with reverberating roar, covering the tracks with six to eight feet of water for a distance of about 200 feet. A portion of the track was washed out, necessitating rerouting. Telegraphic communication was temporarily discontinued.

The intense heat of the past few days together with heavy rain had been believed to have been responsible for the slides.

## A Miraculous Escape

Child Run Over By Train Escapes Injury

Parkhill, Ont.—To have a fast passenger train run over rails between which she was sleeping and emerge unhurt, was the strange experience of the two-year-old daughter of Ralph Robinson, of East Williams. The child owes her life to the fact that she lay in the exact centre of the rails and did not move while the train was passing over her.

The child had wandered away from her home and, evidently exhausted, stretched out on the warm cinders of the Canadian National Railway's right-of-way. Soon after she fell asleep the train passed over her.

## Train Get Coal

London.—The Daily Mail says almost complete stoppage of the Lancashire cotton mills is expected owing to lack of coal supplies. Very few firms have another week's supply and there is little likelihood of their getting more, owing to the miners' strike.

## Heavy Rains In Japan

Tokyo.—Heavy rains in Western Japan have drowned thirty persons and destroyed about 4,500 houses.

## Armament Committee Adjourns Until August

Will Then Meet To Study Methods Of Limitation

Geneva.—The American delegation took a strong position in the disarmament discussions against the plan of comparing the armaments of countries by a comparison of the military expenditures. The project was defeated by a large majority.

After the discussion, the military committee adjourned to August 1, when it will continue its examination of the technical aspects of disarmament, and study especially methods of limitation.

The League of Nations signalled the recess by issuing an official communique summarizing the work achieved, but refrained from comment or predictions.

The official communique lays stress on the expert's work in enumerating armaments as, first, the forces in service in peace time; second, the forces prepared for war time; and third, military war forces created during hostilities by utilizing general resources.

The power of a country in war time is declared to depend on those factors which constitute its power in peace and on the conditions of time and preparedness under which all its available resources may be applied in war.

## London Has Meat War

Rival Packing Firms Cutting Prices Away Below Cost

London.—A meat war is raging in London. The Daily Mail. Argentine beef has been selling this week at Smithfield, London's central meat market, at less than it costs to import it.

The Daily Mail, which is investigating the circumstances, traces the low price to a war among rival meat packing firms. The newspaper declares the war is being waged with relentless fury, notwithstanding that everyone denies its existence.

During the past year, The Daily Mail declares, firms concerned in importing beef from Argentina are estimated to have lost any thing from £4,000,000 to £10,000,000. Nevertheless importation continues without any concerted regard for public needs and apparently will continue until one of the big concerns has found courage enough to admit it cannot go on losing money at all have done during the past year.

## THE QUESTION OF EQUAL STATUS FOR DOMINIONS

London.—The issue of dominions and treaties was raised in the House of Lords when Lord Parmoor, asking for information on the nature of obligations which treaties contracted by Great Britain impose on the dominions, called attention to the inconsistency arising from the fact that the dominions were subject to dangers and obligations of great Britain declared war to enforce treaties, whereas the dominions after the war they had helped to win, were now claiming the positions of equal partners who have achieved full status.

Lord Clarendon, under-secretary of state for dominion affairs, replying for the government, said the importance of the issues raised were realized and they would be discussed at the imperial conference. He had only recently received a report of the debate at Ottawa and had not yet found time to digest it.

The under-secretary said the government was most anxious to assert fully and strongly the importance of the issues raised by the principle of equal status and said it was his opinion that the strength of the opinion did not depend on the form of constitutional principles as much as the belief of the people in the righteousness of the cause they upheld.

## Railway Union Upholds Chief

Gives Vote of Confidence to Veteran British Labor Leader

Weymouth, Eng.—Hon. J. H. Weymouth, secretary of the National Union of Railwaymen and one of the leaders in the settlement of the recent general strike, has received another vote of confidence from his union.

A demand for his dismissal, because of his conduct during the general strike was supported by only six of the delegates to the union's conference.

The resolution demanded his resignation for signing the award of the National Wages Board, whereby the railwaymen were not given the undiluted grading they had asked.

It was defeated by an overwhelming majority.

## MACKENZIE KING TAKES ISSUE WITH PREMIER MEIGHEN

Ottawa.—In a statement recently issued, Mr. W. L. Mackenzie King again takes issue with Premier Meighen on the constitutional status of the present government.

The recent statement of what he describes as the "temporary government," that the procedure followed at dissolution of parliament was exactly the same as that prepared and proposed by Mr. King himself when he sought dissolution four days earlier, is not true, says Mr. King, and he adds, if it were true, it would not alter the fact that the moment Mr. Meighen assumed office his responsibilities in tendering advice to the governor-general became his own.

The late King Government, says the statement, fully intended that their statement should be dissolution only after proper prorogation had been made before both houses of parliament, and after all the usual formalities had been observed.

The recent statement of Hon. Hugh Guthrie, acting minister of justice, deals chiefly with the formation of the present government and very little with the "fundamental question of the appointment of ministers of the crown for the purpose of carrying on government and administering public departments in accordance with recognized constitutional practice and law," says Mr. King.

It was "presumption," says the former premier, for Mr. Meighen to continue to advise the governor-general after his adverse vote in the House of Commons the night before. This "unwarranted violation of constitutional right," says Mr. King, "permitted to continue," says Mr. King, "cannot fail to undermine the whole fabric of constitutional government in Canada and the fundamental principles of self-government under British institutions in whatever quarter of the globe they may be held in honor today."

## Britain Has New Flying Boat

Machina Just Completed Is Intended For Submarine Spotting

Hull, England.—A new triple-engine flying boat, features of which are jealously guarded, has been taken on her trials. Built at the Brough aerodrome of the Blackburn Aeroplane and Engineering Company, the flying boat has been named "Iris." She has, it is stated, taken two years to construct, and has cost £26,000. Her maximum engine capacity is given as 2,000 h.p. The machine is intended for submarine spotting and general reconnaissance.

There is accommodation for a navigator, three pilots, and a crew of about ten men. The trial flight was, it is said, satisfactory.

## Relics Of Former Days

Manitoba Historical Society Is To Get Historic Cannon

Winnipeg.—Some of the cannon that were used by the British in the Red River campaign, the company's post, Fort Garry, the creeper-covered gateway of which alone remains, are likely to come into the possession of the Manitoba Historical Society, which was recently organized.

The guns were mounted for action when Louis Riel held the fort but fled at the approach of Col. Wolsey's troops. Another interesting relic of the Red River settlement days that has been donated to the society is a Red River cart. Historic societies in other parts of the Dominion have offered to co-operate with the local organization.

## To Study Law In Quebec

Premier's Son To Be Student At Laval University

Quebec.—Theodore Meighen, son of the prime minister, is among the candidates for admission to the study of law who are now here for the semi-annual examination of the bar of the province. Mr. Meighen is entering Laval University here in the fall.

In all, 141 candidates for admission to either the study or practice of law are taking the examinations.

King Recieves Lord Willingdon London.—Viscount Willingdon, who is to succeed Lord Byng as governor-general of Canada, was received by His Majesty King George last week. It is understood that Lord Willingdon's recent mission to China in connection with the Boxer incidents was entirely successful, and that he has been more successful than his new Canadian appointee.

## "Picturesque America" Includes Picturesque Canada

1. Twin Falls, Yoho Glacier. 2. A Raft of Fun—Lake O'Hara.

Can you imagine a span of a thousand million years or so? If you can, try to picture to yourself the place where the Rocky Mountains now stand, with their snow-crowned peaks towering into the sky, at the bottommost depths of an inland sea.

Do you know how the Rockies were formed? By what Titanic forces these great masses were crumpled and folded and lifted high in the air?

It is a most interesting story that geology tells us concerning the formation of this gigantic range through the ages—ages before the human race dwelt upon the earth, and only one of the many other fascinating things that one learns about one's own land, in "Picturesque America," a deluxe volume, superbly illustrated with 539 photographs, and charmingly written, which has been published recently by "The Resorts and Playgrounds of America," New York.

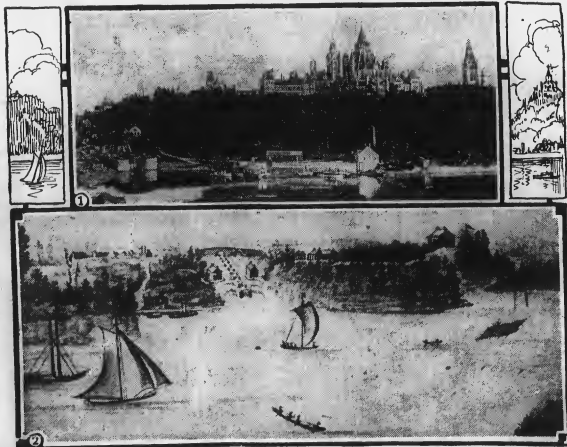

It is a complement, and not one undeserved, to Canada, that this book, which describes so clearly and well, the wonders and beauties of the parks and beauty spots of North America, should give over more than one-quarter of its space to Canada's great playground. Yet it cannot but be recognized that her parks are unique in their magnificence of form and beauty of

color, in their preservation of game and wild creatures, and in their possession of great virgin forests and vast regions as yet unexplored.

The National Parks of Canada are 14 in number and range in area from a few square miles to 4,000 square miles. For the most part they are found in the western part of the country; while the three most beautiful Rocky Mountain parks, Banff, Yoho and Glacier, lie along the main line of the Canadian Pacific Railway.

Many well-known writers, such as Robert Sterling Ward, Zane Grey, Mary Roberts Rinehart, Henry Van Dyke, Charles Lummis, Arthur Stringer, Mary Carolyn Davies, and J. H. Harkin have contributed to this volume, which maintains a high standard of literary quality throughout. Verses of nature by equally well-known poets are scattered throughout, and there is added a complete index and bibliography. Hence besides the charm of the book it is invaluable as one of reference. It would seem that its purpose—to make better known and thus better appreciated the scenic marvels of America's wonderlands, must be accomplished.

## Choice of Dominion Capital To Be Celebrated

1. Entrance to Rideau Canal in Ottawa River before fire destroyed Parliament Buildings. 2. Old entrance to Rideau Canal—Parliament Hill, as it looked 100 years ago, at right—from painting by Chas. at time of opening of Canal, 1826.

In the late summer of 1826 Lieutenant-Colonel John By, of the Royal Engineers, selected the spot where the Rideau Canal should enter the Ottawa River, and in so doing settled the site of what afterwards became the capital of the Dominion of Canada. The centenary of this event is being marked this coming August by a celebration which is expected to be national in character. The Dominion Government has already intimated its intention, not only of taking part, but of signaling the occasion by extension of its works for the beautification of the capital. The celebration itself will include historical pageantry and will draw from the western plains a spectacular "Stampede" as illustration of one of the historical phases of the development of that broad section of the Dominion.

In making his journey up the Ottawa, Colonel By was not planning for the capital of a Dominion but striving to strengthen the defenses of one of the outposts of the British Empire. "During the war of 1812-15," says Hannett P. Hill, in a brief history of the construction of

the Rideau Canal, "the British authorities experienced much difficulty in attempting the defence of the western part of the province. This was owing to the difficulties of transporting men and supplies from Montreal to Kingston, because of the rapids on the St. Lawrence River. They were also faced with the danger of a U. S. army blocking progress up the river by seizing some of the islands near Kingston. The cost of transport from Montreal to Kingston was also excessive, being fifty-four shillings per cart."

This was the problem which Col. By came out to Canada to solve. He had spent nine years in this country after 1802, when he had been entrusted with the construction of the Martello towers at Quebec and the rebuilding of the Citadel, and he had also superintended the construction of the Cedars Canal near Montreal. The task of building the canal to connect the St. Lawrence and the Ottawa Rivers, 126 miles in length, through uninhabited country, was gigantic at that stage of the development of the country, and its successful completion stamps its builder as an engineer of high rank.

## Two Prairie Provinces Will Attain Their Majority In Regard To Age On Sept. 1st

The two Canadian provinces of Alberta and Saskatchewan attain their majority in regard to age on September 1st next. They will then be 21 years old as provinces of the Dominion. Prior to that date the area they now embrace had the status of territories administered largely by the Canadian Federal Government.

The occasion of the two provinces reaching their majority provides an interesting retrospect. In 1905 the combined population of Alberta and Saskatchewan was 400,000 in round figures. It is now 1,500,000. The value of the annual agricultural production has increased in 21 years from about \$100,000,000 to \$350,000,000.

Alberta's wheat area is now nearly thirty times that of 21 years ago. The production of grain is nearly fifty times as great as in 1906. The average yield of wheat in 21 years has been over 18 bushels to the acre. Less than 11,000,000 of the 50,000,000 acres suitable for farming are sown to field crops. In this period Alberta has developed a dairy industry with products totalling in value more than \$20,000,000 annually.

Twenty-one years ago Saskatchewan produced 26,000,000 bushels of wheat. Last year the yield was over 240,000,000 bushels, more than half of the total wheat production of the Dominion. It is now the principal wheat growing area in North America, if not in the world.

While wheat is still the main crop, varied farming has made rapid progress in all parts of the province. Twenty-one years ago butter was imported by the carload into the province. Last year the creamery butter production amounted to fifteen million, eight hundred and fifty thousand pounds. There still remains 58,000,000 acres in Saskatchewan available for profitable farming.

These two youngest of the nine sisters that form the Federal Union of the Dominion of Canada have reason to be proud of the robust state of their progress in 21 years.

### Amateur Mushroom Cultivation

The Fall is the Best Time For Preparing Beds

Few people have as taste for mushrooms and many would like to grow them. The latter would be well advised to send to the Publications Branch of the Department of Agriculture at Ottawa for Circular No. 45, wherein Mr. H. T. Gussow, the Dominion botanist, tells of the requirements of a growing bed of mushrooms. The circular, it might be stated, has been specially prepared for amateurs, who are advised to proceed slowly at the start and to take care that the fundamentally important facilities are provided. In the first place the cultivation of mushrooms out of doors in Canada is not recommended as a warranted success. As they do not require light, a cellar below a dwelling or a place used for storing vegetables will answer. The fall of the year is considered the most suitable time for preparing the beds. The fundamental requirements, says Mr. Gussow, are the facilities with which the requisite temperature and degree of moisture may be maintained and controlled, keeping these elements at a uniform level, being the first condition to success. Nothing, says our authority, seems more disturbing than sudden drops in temperature or the absence of a system of ventilation preventing the regulation of moisture in air and bed. Proceeding from this counsel the circular deals with the necessity of manure and methods of treatment, preparation of the beds, the spawn and special manner of cultivation.

### Holland Farmers Produce

Buy and Sell Bulk of Products on Co-operative Basis

Because Holland is an agricultural nation the exceptional progress made there in agriculture since the war has attracted wide notice. The farmers buy the bulk of their materials including seed, fertilizer and equipment, on a co-operative basis and two-thirds of their crops and dairy products are handled through co-operative agencies. Milk is sold on the percentage of butterfat it contains and this is having an effect on the productivity of the herds.

Mother: "Oh, my boy will die! My boy will die," she sobbed. "He will not take the medicine that would save him!"

Father (in bed): "Don't cry, mother, father'll be home soon and he'll make me take it!"

W. N. U. 1537

### Miss MacPhail Commends Egg Grading

The Guarantee of Quality Raises the Standard

Miss Agnes MacPhail, member of parliament for Southeast Grey, put in a good word for egg grading during a discussion of the subject in the House of Commons. The discussion arose from an offered amendment to the egg grading regulations calculated to relieve egg producers of the necessity of having their eggs graded when offered for sale on a public market. Miss MacPhail had from experience learned of the advantages of marketing eggs through a co-operative system. The effect of grading, she claimed, is, in the first place, to raise the standard. The consumer, she pointed out, is guaranteed that if he buys under the act, he will get just the quality he wants. Anyone who goes into a store and purchases "extra" or "pullet extra" will know exactly what he is getting. The standard has been raised, and on account of the guarantee of quality the consumption of eggs is increased. The eggs produced on Miss MacPhail's farm had, since egg grading came in, been shipped out through a co-operative pool. The eggs are taken from the nest twice a day and the nests are kept perfectly clean. Eggs having the slightest visible crack or other defect are not shipped. In fact only such eggs are shipped as are strictly fresh and will be likely to grade either "extra" or "pullet extra." Those who pool eggs in Ontario, Miss MacPhail claimed, are increasing in number all the time and are very much in favor of the grading principle. After a considerable discussion in the house by several members, the proposed amendment was submitted to the special committee on agriculture and colonization where it was again discussed and the resolution ordered to be filed without further immediate action.

"The collection this morning," observed the vicar, "will be taken on behalf of the arch fund, and not, as erroneously printed in the service papers, on behalf of the arch fund."

The days are past when the grocer used to stick a potato carelessly on the spout of a kerosene can.

### The Care Of Growing Pullets

Development of Pullets For Early Winter Egg Production

Good parent stock, good shade range, a well balanced ration and comfortable housing are essential for the development of pullets for early winter egg production. Without a free range they will not be properly matured before weather conditions make it necessary to put them into winter quarters. Dry, well-drained land with plenty of shade and growing green feed are essential.

From the age of two months a dry mash, consisting of equal parts, by weight, of cornmeal, bran, shorts, ground oats, and beet scrap should be kept before the pullets constantly in self-feeding hoppers. In addition a semi-wet mash consisting largely of chopped green feed such as mangold tops, alfalfa, clover, cabbage leaves, corn or sunflower tops, etc., should be given twice a day. It is also necessary to keep before the pullets constantly a hopper of good mixed grain and a supply of milk. Clean, fresh water should be before the birds at all times and oyster shells and grit should be always available.

The pullets should not be kept in the same quarters as hens. A portable colony house on skids can be made inexpensively. It should be dry and well ventilated with plenty of space, as on no account should there be overcrowding.

### Co-operative Hatchery

Will Be Established in Calgary in the Near Future

A province-wide co-operative hatchery and brooding establishment will be started in Calgary in the near future, as soon as a building site has been selected.

It is the object of the establishment to have four units for the first year. Each unit comprises a 15,000 egg capacity electric incubator and 60,000 capacity brooding house. The farmers will send their eggs to the hatchery where they will be hatched in the large incubators and the chicks kept until they are old and strong enough to look after themselves, when they will be shipped back to the farms.

It's easy to be patient when you have nothing to stake.

## Agricultural Colleges Have Contributed Enormously To Farming Industry In Canada

### Western Land Prices Low

Great Importance For Immigrant Farmer Says Governor of Hudson's Bay Company

Speaking at the annual meeting of the Hudson's Bay Company in London, Charles Vincent Sale, governor of the company, in referring to the heavy taxation of the company retained the proprietors that it all had been charged to capital receipts in respect of land. Consequently 2,519,000 acres, which still remained in possession of the Hudson's Bay Company, were an entirely free asset.

The governor pointed out that the present price of land in the prairie provinces of Canada was lower than that of similar land in any other part of North America, despite the fact that the average tax on farm land was lower in Canada than in the United States, and the average yield of spring wheat was high.

Available figures suggested that the prices of farm lands in Canada were as low as they ever would be, he continued.

Here, then, was the great inducement which Canada offered to the immigrant farmer—the cheapest land with the highest yield in the North American continent.

### Wool Exports

Total exports of wool from Canada in the fiscal year ending March 31st, 1926, amounted to 6,514,767 pounds, valued at \$2,342,887, as compared with 5,525,284 pounds, worth \$2,434,524 in the previous fiscal year. Contrary to the previous year, when the United Kingdom received large shipments, practically the entire export clip went to the United States, which took 6,683,904 pounds, valued at \$2,325,751.

Among the words that indicate the approach of warfare are these: They will make their home with the bride's parents.

### Agricultural colleges, demonstrating and experimental farms have

enormously increased production in Canada and have very considerably more than paid for their upkeep in that and other respects, maintained Principal J. B. Reynolds, of Guelph Agricultural College. In the course of an address at a luncheon, under the auspices of the Kiwanis Club of Ottawa, and members of the Canadian Society of Technical Agriculture, Principal Reynolds urged there might well be a science of agricultural apologetics, as there was of theological apologetics. The idea being to bring home to the people at large the enormously beneficial results of technical training and of scientific agriculture.

Principal Reynolds maintained that the choice may lie as between fewer and less faring on scientific lines and with a higher standard of living, and many farming, but with a low standard of living. According to some agriculturists it was not difficult to account for a certain amount of exodus from the farm as the need for so many new working is reduced by scientific methods.

The principal was not enamored of synthetic farming. He told of a friend who merged six one hundred acre farms into one six hundred acre farm, and when he saw him recently he had had to send several thousand dollars from his city business to make up a deficit on the operation of the big farm.

### Free Homesteads Taken

A Great Deal of Free Land is Still Available in the West

In the month of May this year 545 homesteads were taken up in Western Canada, an increase of 231 over the number of entries in May, 1925.

Of the total of 545, seventy-two entries were made by Americans in Saskatchewan there were 215 entries of which 123 were in the Prince Albert district and 109 in the Moose Jaw area. In Alberta the entries totaled 220, of which 148 were in the Edmonton district, 44 in Peace River and Grand Prairie, and the remaining 17 in the Calgary and Lethbridge districts. The entries in Manitoba totaled 70, of which 54 were in the vicinity of Dauphin and 16 in the Winnipeg district.

The Canadian Government still has fairly large areas of land for homestead entry in Manitoba, Saskatchewan and Alberta, and in the Railway Belt and Peace River Block in Alberta. Free River Block of 160 acres are made to British subjects or those who declare their intention of becoming British subjects. An entry fee of \$10 is charged by the Canadian Government and certain conditions of residence and cultivation are required to be fulfilled within three years.

The homestead lands are now a considerable distance from the railways—40 to 60 miles—and consequently settlers with some capital may regard the purchase of good farm lands close to railways and markets at \$15 to 20 an acre on long term of payment as a better economic proposition.

### Have Means of Communication

Scientists Are Working On Bees' Method of Bearing News

The mystery of communication among bees has been for years a subject of careful inquiry, with the following information as a result. Bees have a system of rhythmic dancing during which they form chains and knots. The news-bearing bee indicates by the action of the dance whether the new find is honey, flowers, pollen or other food. Now the description of the find is communicated, this by means of a scent organ or gland which has hitherto escaped the attention of microscopists. Scientists have made a series of experiments designed to determine whether the color of flowers in any way helps bees to locate food supplies. It does not. Flowers have been taken by placing the inside of one beeper in the petals of another type. In no case has it been possible to deceive the bees. A thorough understanding of how bees transmit ideas may provide a clue to other systems of insect communication and further be of practical value to beekeepers.

### Not Too Exact

Lanchoy: "Not too exact, I'm making off with his (overalls)." "I beg your pardon, sir, but in case we don't meet again, may I have a couple of clews out of the pocket?"

She: "A dollar doesn't go as far as it used to."

He: "No, but it goes faster."

## Trail Riders' Third Annual Pow-Wow

1. Ready to go after pitching camp 2. Scouting ahead.

The grave old mountains that surround the beautiful Little Platteau valley near Lake Louise will hear and see things this summer that will remind them of the good old days when Indian hunters and warriors made the hills echo with their shouts when they danced about their great campfires; for this lovely spot has been chosen by the Order of Trail Riders of the Canadian Rockies to be the place where they will hold their annual Pow-Wow on August 1, following the official trail rides.

Many parties have camped in Platteau Valley, but never such a one as there will be this summer when the trail riders gather from all over the world to attend their great feast. Then the deep silence of mountain and lake will be broken for one day when the hoof-beats of several hundred ponies sound through the valley.

From all indications the Pow-Wow of 1926 will be bigger and merrier than those of previous years. At noon on August 1, two parties of trail riders will meet at the camp in the valley, pick their tents, and when night falls, light a great fire around which the official ceremony will be held, and join in singing trail riders songs.

There will be two official trail rides this summer, both a five-day ride and a three-day ride. Members going on the longer ride are meeting at Lake Louise, so famous for its beauty and its magnificent Canadian Pacific

Chateau, on July 29, and following the trail up the Bow Valley to Mosquito Creek, making a side trip to Bow Pass, then up over Molar Pass, and up the Little Platteau to Baker Lake, as by the Platteau trail to Platteau Valley. They plan to make 20 miles on the first three, 16 miles on the fourth day, and 9 miles on the fifth.

Those taking the three-day ride will start from the Banff-Lake Louise road and follow the trail past Johnston Creek to Baker Creek and Baker Lake, and so to Platteau Valley. This party will travel more leisurely, making about 14 miles a day for the first two and nine miles on the third day. After the Pow-Wow all the trail riders will return to Lake Louise by Corral Creek.

The Order of the Trail Riders is just three summers old this year, and already has a membership of about 600, more than 100 of which have enamel buttons showing that they have travelled more than 2,500 miles. The

red have buttons, too, different kinds according to the distance they have travelled: a bronze button for 50 miles, a silver one for 100 miles, and one for 500 miles, and a gold and enamel one for 1,000 miles.

Its aims are chiefly to encourage horseback travel through the Rockies, to promote the breeding of suitable saddle horses for high altitudes, to keep up old trails and build new to protect the forests and encourage the love of outdoor life and the study and conservation of wild life, to prepare and circulate maps of existing and proposed trails, and help maintain the observance of close and open seasons for fish and game.

The order has recruited its members from all classes, all ages and all parts of the world. Last year's Pow-Wow was attended by artists, writers, Purse nobility, Indian chiefs and American millionaires. Leading the rodeo was a lady of seventy, while a lad of twelve brought up the rear.

### Losses During Haymaking

Rough Handling is the Cause of Serious Damage

The time of cutting various forage plants for hay purposes plays a very important part in both the total amount and the palatability of the nutrients obtained, but even though the crop is cut at the present time, the subsequent method of handling may result in serious loss. The following practices are recommended by G. P. McGoat, forage crop specialist of the department of agriculture at Ottawa, as material aids in preserving the original food value during the curing process: Get the hay into swaths or cocks before the leaves become dry through to shatter; in showery weather, cut the hay in the swaths and let it lie cocked up as soon as it is fit to handle as lightly and carefully as circumstances will allow.

Rough treatment of the harvested crop during curing, or allowing it to lie in the swaths until the leaves are quite dry, increase the losses due to shattering to an alarming extent, especially in the cases of the clovers and alfalfa. It should be remembered that the leaf is the most palatable portion of the various grasses and clovers, but contains a considerably higher percentage of protein than do the stems.

### Our National Wealth

Wealth Per Capita Stands High in Comparison to Other Countries

In estimated national wealth in millions of dollars, Canada stands seventh on the list, higher than Australia, Brazil, Argentina and in fact higher than in any of the newer countries, according to Dr. D. A. MacGibbon, professor of political economy, University of Alberta. In wealth per capita dollars, Canada is only surpassed by the United States and Great Britain. Canada is among the only five nations showing a surplus on current account and is also among those countries having a food surplus. The rank fifth among the nations as an exporter and seventh as an importer.

### The Overhead

Does "What's the item on your expense account?" "Overhead expense \$47."

Travelling Salesman: "That was an umbrella I bought."

Just As Good

"Do you have animal crackers?"

"No, but we have some very nice dog biscuits."

WORLD HAPPENINGS  
BRIEFLY TOLD

The military committee of the preparatory disarmament commission adjourned until August.

Thirty-one deaths and damage estimated at \$2,000,000 are attributed to the recent storms and floods in Germany.

Dr. Otto Ludwig, Weidolf, former German ambassador to the United States and director-general of the Krupp Works, died July 5.

The Swedish Government, growing tired of having so many drownings every year, has started a drastic campaign to force everyone to learn to swim.

Rioch Courtney, 77, veteran of the Joseph Bonelli in 1885, at one time Indian agent at the P. M. Man, and also connected with the Indian department at Prince Albert, is dead at New Westminster. He was a native of Ireland.

Seven marshals of Italy, in addition to the King and Premier Mussolini, have promised to be present at the elaborate ceremony when the foundation of the Victory Monument is laid at Bobbio, Italy.

Advices from Lenz say enormous damage has been caused in a large section of Upper Austria by floods, caused by cloudbursts. The dispatches say there has been loss of life but no figures are given.

The administration of the Hohenzollern family has notified the Prussian state of the willingness of the Hohenzollerns to resume negotiations concerning the disposition of the property in the state owned by the former royal family.

The London Daily News' political correspondent states that Lord Bryce's action in refusing disqualification to former Premier W. L. Mackenzie King will be brought up for discussion by one of the Dominion premiers at the imperial conference in October.

The United States submarine S-51, rammed and sunk off Black Island by the steamer City of Rome last September, was towed to the Brooklyn navy yard. The submarine, which had 23 aboard, when it went down, was raised after a series of unsuccessful attempts. It is believed the submarine contains the bodies of 25 sailors.

## Equal Political Rights

**British Women Under 30 to Fight for Franchise**

British women asked to open to a vigorous fight to do away with present suffrage laws which exclude them from the right to vote until they are 30 years old.

Many prominent men have agreed to join a great mass meeting to be held by forty women's societies in the interest of equal political rights. Among them are Lord Hailford, Lord Cecil and Fieldwick Lawrence, M.P.

George Bernard Shaw, the noted playwright, however, has declined to participate.

Under the present suffrage laws in England, 5,000,000 women above the age of 21, but below the age of 30, are unable to vote while the qualified men above the age of 21 have ballot men.

All the old-time suffrage leaders and thousands of other prominent women resent this discrimination.

## Fail To Scale Peak

**Mountain Climbers Experience Hardships in British Columbia**

Requipped by British Columbia's 13,000-foot "mystery mountain" after a 32-hour struggle for victory across huge glaciers and high snowfields in the hitherto unexplored heart of the Coast Range, an Alpine Club expedition came close to facing actual starvation on the homeward trip, according to members of the party who returned to Vancouver. They spent five weeks in satisfying themselves of the existence of such a great peak within 150 miles of Vancouver and in sight of (dreaded) at the head of Bute Inlet.

The climbers reached an altitude of 10,000 feet on June 24.

## Canada Reverts to Gold Standard

Canada has now reverted to the gold standard. In other words, any holder of paper currency issued by the Canadian Government or by any chartered bank in Canada may exchange his paper for gold—if he wants to. Canada is nominally a gold standard country, but during the war found it necessary, for financial purposes, to suspend payment in gold, and the paper money issued by the banks was made legal tender. Penny postage is now in effect.

It is rather a curious fact that the three popular beverages, tea, coffee and cocoa, all were introduced into England within a few years of each other.

W. N. U. 1637

## To Make Film At Jasper

Screen Feature Portrayed In Magnificent Settings of Canadian Rockies

Jasper, the world's largest national park is to provide the setting for one of the great moving picture epics of the year. "The Country Beyond," an adaptation of the story of that name by James Oliver Curwood, which is being produced by the Fox Film Corporation under the personal direction of Mr. Irving Cummings. The cast, which is a notable one, includes such stars as Olive Brice, J. Parrell Macdonald, Ralph Graves, Fred Kehler and Lawford Davidson, as well as a number of others of outstanding ability.

Two sections of the park have been chosen by Mr. Cummings as the setting for his play. Recently the company started work beside the jade waters of the Lake of Forgiveness, which lies in the shadow of Mount Edith Cavell. There and about Jasper Park Lodge, on the shore of Lac Beauvert, the preliminary work is being carried on. Later the entire company will move by pony rail to Malgine Lake, where the remainder of the picture will be filmed. The work will occupy almost three weeks, and it calls for an expenditure of almost a quarter of a million dollars.

Never before has Hollywood come so far north to film a picture. This is the first time in the history of the motion picture industry that a complete screen feature has been produced north of the international boundary.

## Synthetic Wood From Sugar Cane

Inventors Have Found Material That Makes Good Substitute For Lumber

Potential houses, railway cars and packing boxes lie in every waving field of sugar cane.

As the sweetening power goes out, building possibilities lie in the residue and waste, for synthetic wood is now made of the crushed stalks. The new industry is spreading across the Mississippi Valley from New Orleans, the heart of the sugar country. One three-million-dollar cane wood plant there, more than 200,000 feet of wood substitute is shipped out in a year.

The substitute has been used in place of wood sheathing on outer walls, for roof and wall insulation, as a base for plaster of outside stucco, for portable houses, refrigerators and railway refrigerator cars, in partitions for recording studios, in auditoriums for correcting acoustics, and for making canisters and packing cases. Inventors have been experimenting with materials that might take the place of wood, against the time when use and misuse of the forests should be a shortage of lumber. Eventually they tried bagasse, the name given to sugar cane when the sugar has been extracted.

## Canadian National Earnings

**70.671 Per Cent Increase in Canadian National Railways Net Earnings**

One Month

Earnings statement issued recently by the Canadian National Railways shows an increase of \$2,325,425.56, or 70.671 per cent, in net earnings for May as compared with the same month of last year and an increase of \$7,740,091, or 299.38 per cent, for the five month period since the first of the year as compared with the same period of 1925.

Gross earnings for the month of May, 1926, were \$22,133,304 as against \$13,456,728 for May, 1925, an increase of \$2,327,586, or 21.58 per cent. Working expenses were \$18,956,937 in May, 1926, against \$17,845,798.23 in May, 1925, an increase of \$1,111,140.44, or 6.24 per cent. Net earnings for the month were \$3,276,365.32 as against \$299,939.77 for May of last year, an increase of \$2,826,425.56, or 70.671 per cent. The operating ratio for May, 1926, is 85.46 per cent, as compared with 97.91 per cent. In the same month of last year.

## Prince Has Worked Hard

**Tireless Energy Has Won Admiration From All Classes**

There are few young men in the world who have worked so much actively and so much hard work into their early manhood. He has tackled the task of learning to swim, and, in fact, he has been a champion swimmer, and of preparing himself for still higher duties, with an enthusiasm, a breezy cheerfulness, and a tireless resolution that have won for him the admiration even of those who are opposed upon principle to royalty in any form.—Montreal Star.

Our respect for old age depends greatly on whether it is applied to men and women or to boarding house poultry.

Giving good advice is all right—it we give it to ourselves.

## One Habit Japan

Will Not Tolerate

**Prefect of Police Recently Issued Statement Against Kissing**

Kissing is decidedly under the ban in Japan, where the art of osculation is described as an "unclean and immodest habit." Recently the Prefect of Police in Tokio issued the following statement:

"Kissing is a custom entirely foreign to Japan, and it is undesirable that it should be introduced into our country. It is unclean, immodest, indecorous, ungraceful, and likely to cause the spread of disease."

This "immodest habit" is so thoroughly repugnant to the Japanese nation that the wonderful statue, "The Kiss," by Rodin, the great French sculptor, is to be taken to Japan for exhibition. It has been placed in a public park with a huge bamboo screen around it, so that the sensibilities of the public may not be shocked.

## New British Industry Growing

Firms Making Artificial Silk See Infinite Possibilities in New Material

The rise of the artificial silk industry is marvellous. Scarcely more than two or three years old, already one British firm alone supplies one-third of the world's demand for artificial silk. The assets of this company are valued at \$400,000,000. A plant in Coventry delivers seven miles of artificial silk thread a second—made of pinewood pulp. Ten thousand workers in Bradford are employed to dye this product. The town of Leicester turns out fifty thousand pairs of artificial silk stockings a year. The Lancashire cotton weavers are adapting their mills to the industry. This new material, at once utilitarian and beautiful, has become the staple fabric for shawls, stockings, dresses, underwear—its possibilities are only something short of infinite.

It is a fascinating story and a heartening one. It shows there is life yet in the old dog John Bull, notwithstanding all the croakers. And it shows, incidentally, that the controversy about the proper name for artificial silk is a serious matter. For it is certain that this silk by any other name is destined to be a household word in all the world.

## Criminals Of The East

Accomplished Western Crook Cannot Compete With Them In Cunning

The criminals of the east are far more subtle, cunning, patient, patient, taking, and adroit than the most accomplished crook to be found in the west. Therefore it naturally follows that the task of catching him must be more difficult.

As is generally known, the head police officials in India are British, although they have the assistance of native experts. There is a native detective in Bombay, a kind of "man" who at a crime investigation could make our best Sherlock Holmes look pretty silly.

## How To Order Patterns

Address—Winning Newspaper Union, 175 McDermott Ave., Winnipeg

Name.....Size.....

Town.....

## Largest Electric Locomotive

**Driven By Six Motors Has Had Trial Trip At Berne**

The largest electric locomotive in the world, constructed by Geneva engineers, was successfully tested in its first trial trip in Berne. The monster weighs 253,350 pounds, is 100 feet long, twenty metres long and is driven by six motors, with a total force of 4,500 horsepower. The locomotive, which can be driven by one man, can easily attain a speed of more than 100 miles per hour hauling an express train. It will be shortly employed upon the International Electric Line of Berne.

## B.C. Fisheries

The fisheries production of British Columbia in 1925 had a total value of \$22,420,253, compared with \$21,287,167 in 1924, according to a report of the bureau of statistics. The value of last year's production exceeds that of any previous year's output, excepting that of each of the years 1914, 1915, 1916, 1917, 1918, 1919, 1920, 1921, 1922, 1923, 1924, 1925, 1926, 1927, 1928, 1929, 1930, 1931, 1932, 1933, 1934, 1935, 1936, 1937, 1938, 1939, 1940, 1941, 1942, 1943, 1944, 1945, 1946, 1947, 1948, 1949, 1950, 1951, 1952, 1953, 1954, 1955, 1956, 1957, 1958, 1959, 1960, 1961, 1962, 1963, 1964, 1965, 1966, 1967, 1968, 1969, 1970, 1971, 1972, 1973, 1974, 1975, 1976, 1977, 1978, 1979, 1980, 1981, 1982, 1983, 1984, 1985, 1986, 1987, 1988, 1989, 1990, 1991, 1992, 1993, 1994, 1995, 1996, 1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2052, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2065, 2066, 2067, 2068, 2069, 2070, 2071, 2072, 2073, 2074, 2075, 2076, 2077, 2078, 2079, 2080, 2081, 2082, 2083, 2084, 2085, 2086, 2087, 2088, 2089, 2090, 2091, 2092, 2093, 2094, 2095, 2096, 2097, 2098, 2099, 2100, 2101, 2102, 2103, 2104, 2105, 2106, 2107, 2108, 2109, 2110, 2111, 2112, 2113, 2114, 2115, 2116, 2117, 2118, 2119, 2120, 2121, 2122, 2123, 2124, 2125, ## A Superior Milk Cap

A milk cap should do more than fit the mouth of a bottle. It should also be easily removable—impervious to water—neatly printed.

All these features are combined in the Appleford milk cap. Made of quality board it hugs the lip of the bottle, yet is so pliable it is quickly removed. All pores are filled with wax to protect the milk from moisture or contamination. The printing is clear-cut and distinctive.

Write for samples and prices.

### CHAPTER IX.

Jonas answered questions. Brandon watched the girl who sat opposite him, across the little table. The wraith-like smile—the smile that irritated while it tantalized, hovered about his lips, and in his eyes. The girl watched brother quickly, alertly, while she surveyed the light scene around them. Her eyes leapt into far corners of the pink and gold hung room. In among the dancers and the other via a table like his own. Suddenly her glance met Brandon's. She nodded at him, as if she had surprised his reflections, what ever they were.

"It was good of you to come," Brandon murmured. "Presently it will not be such a simple matter to visit a get to take from you."

"After awhile, I hope, you will tell me what you know and I don't know, of what presently is to be for me," Jonas returned, the serious cloud which was never far absent, showing again in her face.

"We shall have to make a new bargain," he said. "That you will accept from me completely that I am only a spectator to your extraordinary circumstances. I shall be part of them, only as you give me favor. What are you . . . ?"

"Please," Jonas interrupted. "Not now—just yet. Of course a man always has a list of questions to put to any girl he is just getting acquainted with, at least that's what I've found, and your list is longer than most, I suppose. I've always had the answers—learned them by heart, you know, but they won't fit now. So I shall have to think when you start in. And I don't want to think—just yet. About myself, I mean."

She fell to looking about the room, eyes wandering restlessly, but shining with the inner setting of the moment.

Brandon had come to her, as they had agreed, in the wake of the flowers

## SICK ABED EIGHT MONTHS

After Taking Lydia E. Pinkham's Vegetable Compound Could Do All Her Work and Gained in Weight

Mellor, Saskatchewan.—"I had awful troubles, headaches and severe nervousness in my back and sides. I was so sick generally that I could not sit up and I was in bed most of the time for eight months. An aunt came to visit and help me as I was unable to attend to my baby and could not do my work. She told me to try Lydia E. Pinkham's Vegetable Compound, and after taking two bottles I could get up and dress myself. I also took Lydia E. Pinkham's Blood Medicine. When I first took the medicine I only weighed seventy-eight pounds. Now I weigh twice as much. If I get out of work or weary again, I sleep I always take another bottle of the Vegetable Compound. It did wonderfully good for female troubles, and I have recommended it to my neighbors. I will be only too glad to answer any letters received asking about it."—Mrs. WILLIAM MITCHELL, Box 486, Mellor, Saskatchewan. C

W. N. U. 1637

glances puzzled her; she recognized something speculative, as if these women, who knew the man whose arm encircled her and who danced as none of Joanna's partners danced, had a common curiosity regard for his unknown companion. She concluded, awfully, that women would profess to not like Brandon, but were secretly fascinated by him. She felt uneasy, again, and was glad when the scene finished.

"Now the questions," she challenged him, abruptly, when he had held a light to her clearest and then to his own.

"But I haven't made a program of them," he protested—once more his voice was like a caress. "I promise to combine them all into one, or two, at most; and be content with whatever you conclude to tell me. What are you going to do?—that, of course, is the first one."

"And that's longer than any list any ever put to me," she assured him. "Yesterday morning I went to my job at the store wondering if I could get along for two weeks' salary. Tonight I'm wondering where to begin to spend money. You see one of my plans—the first one I made got all smashed up somehow, I don't know how—but it's gone, anyhow."

"That was a most interesting chap who waited for you last night in the drawing room," he ventured. "I wonder if the smash you have in mind came after I left you."

Jonas looked out, into the room, as if, in the brilliance of the scene to soothe her memory of the hours in the "drawing room" after Brandon had gone.

"Yes," she admitted, quietly. "After you left. You see John was all that I had, the only one to share with. He gave a knife into me and twisted it around."

"That shouldn't be serious," Brandon observed. "Wounds of that sort are easily healed. He'll soon be thinking better of his temper—and his suspicions."

"I am not so sure of that," she returned quickly.

"He doesn't understand me—it seems as if nobody does. But he was the only one who hurt. It would be easy to straighten out his mind, of course. But he couldn't preach at me, any more. That would make him uncomfortable."

"Was it, then, so serious? Is he so very necessary?"

Jonas shot a quick glance at her questioner. "I decline to answer that now. You said there was that one second question—what is that one?"

"You have already answered it," he murmured. "I had to do with—John. I won't ask any more about him. I am to be his rival, your know."

Brandon's habit of saying this sort of thing so easily, roused Joanna. Any of her boys tumbled dreadfully when they attempted deft gallantries.

"I believe you could walk into any woman's eyes and say, 'I love you' with a few conciliatory words without a quiver," she challenged him.

He laughed softly. "You will find few men, in your new career, who will hesitate with such a vow," he replied. "And, I fancy, you will not be long learning how to meet all such emergencies."

"I shan't fear the men," she agreed. "It's the women. I wonder how I can bring myself to measure up. You see I realize that I shall have to lead a lot of new—well, learn a lot."

"Did give most anything if you would finish your phrase—a lot of what?"

(To be continued)

### Turned Tables On Humorist

Steamship Official Had Joke On Irving S. Cobb

The well-known American humorist, Irving S. Cobb, tells this story against himself.

Being desirous, towards the close of his last visit to England, of booking his passage back to New York, he applied at one of the London offices for certificates of sailing, and asked in his inimitable way:

"Have you a ship called the New York sailing to America?"

"No, sir," came the reply, "we have not."

Cobb had another go. "Then perhaps it is the Rheumatism—can you book me a passage by that?"

"No, sir, I cannot," replied the official, who by this time had divined that he was dealing with a joker. "We have no ship of that name. But I think I can fix you up all right on the Lunatic or the Idiot."

## Face Badly Broken Out With Pimples Cuticura Healed

"My face was so badly broken out with pimples that it was actually disfigured. They first started with a few blackheads on the sides of my nose, and festered. The pimples spread to my forehead, chin and neck. They itched and burned so that I could hardly rest. They looked so badly that I was ashamed to be seen in public. The trouble lasted about three years."

I read an advertisement for Cuticura Soap and Ointment so purchased some. I used about two boxes of Cuticura Ointment and four cakes of Soap and was healed." (Signed) Mrs. John Kelly, Rt. 3, City, Mich., Nov. 5, 1925.

Nothing so insures a healthy, clear complexion, soft, smooth hands and glossy, luxuriant hair as Cuticura Soap, assisted by Cuticura Ointment when necessary.

Small bottles of Cuticura Soap and Ointment, 25c. each. Large bottles, 50c. each. Cuticura Shaving Stick, 25c.

### Ancient Inscription On Rock

Story of Battle Fought by Norsemen Near Spokane in Year 1010 A.D. Runic Inscriptions translated by Prof. Olaf Opjen as telling of a terrific battle between a band of Norsemen and Indians in the year 1010 A.D. have been found almost within the city limits of Spokane.

In announcing the discovery, Prof. Opjen said a great lava rock, which bears the inscriptions, marks the burial mound of 12 Norsemen who were killed in the battle.

Professor Opjen, widely known as a translator of Runic characters, appeared in several parts of North America, declared the discovery is the greatest Norse record ever found in the United States.

Located beneath high cliffs beside a cold water spring, the indelible paintings describe details of a great conflict fought more than 600 years before Columbus discovered America.

A band of Norse Vikings, consisting of 21 men and seven women, was following an old trail while travelling from east to west in 1010, Mr. Opjen explained.

"Exhausted and thirsty, they came to the spring beside the trail and camped," he said. "The spring was not a large one, and the water was drained from it. A party of Indians came along and found the spring empty. They immediately attacked the Norse party in an effort to drive it away."

Letters To The Editor

Criticism Made by Readers Usually Taken With Good Grace

For many years, when untoward events disturbed him, the British eased his mind by writing to the London Times. He cared not if only the editor read his contribution; it was his bit of news, and then he went about his accustomed work.

Are letters to the editor read? They are. A controversial storm is often stirred up by one. It may be a simple matter like, "Why read the end of a novel first?" or a world-disturbing debate. Once it gets started it is hard to stop; in fact, many an argument keeps on in the files after it is impossible to print any more letters.

I set an editorial to news writers make a mistake of fact and the army of letter writers is upon him like a flash. Such a chiding benefits us all, even when it is harsh. Sometimes, like the small boy punished for his own good, we may not see the point right away, but at least we try to take it with good grace.—New York Times.

All Right In Theory

Things Do Not Always Work Out As They Should

Henry Ainley, the great English actor, confesses that for "night" he is invariably suffers badly from stage fright.

A friend in whom he confided this fact was skeptical. "To a man like yourself," he said, "who is used to appearing behind the footlights continually, such a thing is surely impossible."

"It ought to be," objected the actor, but unfortunately it isn't. I am, in fact, to some extent in the position of the little boy who was being taught to swim."

"Your body being lighter than water," he was told, "you cannot possibly sink."

"I know all about that," said the boy. "But I do."

A Good Start

Teacher.—How old are you, little boy?

Sonny.—I'm six and five-twelfths (fractious).—I'm six and five-twelfths.

Tact does not remove difficulties; it merely goes around them.

Minard's Liniment for Burns

### Sign Posts Of The Sea

Sailors Gain Information From Buoy Which Mark Certain Places

As the traveler by land looks to the signposts at cross roads and elsewhere for guidance on his journey, so does the sailor gain information from the buoys or signposts of the sea which mark the water at certain spots.

But, unlike the ordinary signpost, these sea buoys would convey little or nothing to the landman at first sight, because the meaning of buoys is a subject that must be studied before it can be understood.

For instance, certain buoys of a recognized shape may always be looked for in certain positions when you are making for a harbor or river from seaward. In such cases your course will be marked by "starboard-hand" buoys—on your right—and "port-hand" buoys—on your left.

A starboard-hand buoy must always be painted in only one color. A port-hand buoy may be in single color or parti-color, but its color must differ from that of the starboard-hand buoy.

The signal buoys, marking middle grounds, must be painted with white horizontal stripes. The beacons surrounding buoys must be painted in a single dark color.

Taking More Tolerant View

People Are Learning Not to Use Harsh Designations

The Salvation Army's discard of the term "heathen" for the milder and less offensive word "non-Christian," in designating people holding other beliefs is in accord with tolerant Christianity. Time was when all who differed in religious belief were dogs of infidels or "non-Christians."

The Christian nations have many times proved friends in need to "heathens" and "heathens" have reciprocated. The time for harsh designations based on difference of religious belief has passed, and a good indication of it is—Self-Controlled Aeroplanes.

World's Largest Passenger Liner

Virtually Fleet Unit

The huge Victoria Rolls-Royce Vanguard air liner, the largest passenger aeroplane in the world, has been fitted with a new gyroscopic control, which once in the air can be set to fly the machine on a given course without the pilot again touching the controls, and is now to undergo a series of day and night flying tests on the Imperial Airways.

The air plant with its new control gear virtually flies itself. Once it is set on its course it continues to fly level even though the pilot vacates his seat—in fact, in an actual test flight the pilot left his controls and sat in the cabin reading a newspaper for half an hour before returning to his cockpit to find that the machine was still flying steadily on its course.—London Observer.

Ships Sail For Arctic

Four ships will sail from Vancouver within the next two weeks for the Western Arctic Ocean, carrying trade goods and stores, work in estimated value of \$100,000.

The Hudson's Bay Company is sending two vessels and a Vancouver trading company the other.

There would be but few mysteries in this world if people looked into everything as closely as a woman looks into a mirror.

Little Helps For This Week

Blessed be of the Lord, who hath not left of his kindness.—Ruth, II, 20.

Not half thy knowledge of adversity Robbed thee of any faith in baptism.

But rather cleared by inner eyes to bless.

How many simple ways there are to bless.

—James Russell Lowell.

If we had lost our own chief good, other people's good would remain; and that is worth trying for. Someone can be happy. I seemed to see that more clearly than ever when I was wrecked. I can hardly think how I could have borne the trouble if that feeling had not come to me with strength.

—George Elliott.

GIVE CONFIDENCE TO YOUNG MOTHERS

By Always Keeping Baby's Own Tablets in the Home

A simple and safe remedy for the common ills of babyhood and childhood. Baby's Own Tablets are a solid base where there is either a baby or a young child. Often it is necessary to give the little one something to break up a cold, a fever, correct sour stomach and banish the irritable habit that accompanies the cutting of teeth.

Experienced mothers always keep Baby's Own Tablets in the home as a safeguard against the troubles that arise their little ones so suddenly and the young mother can feel reasonably safe with a box of these Tablets at hand and ready for emergencies.

Baby's Own Tablets are a solid base where there is either a baby or a young child. Often it is necessary to give the little one something to break up a cold, a fever, correct sour stomach and banish the irritable habit that accompanies the cutting of teeth.

A philosopher says that every failure is a step toward success. This explains why some men become richer every time they fail.

Excellent for Croupy Children.—When a child is suffering with croup it is a good plan to use Dr. Thomas' Electric Oil. It reduces the inflammation and loosens the phlegm giving speedy relief to the little sufferer. It is equally reliable for sore throat and chest, earache, rheumatic pains, cuts, bruises and sprains. Dr. Thomas' Electric Oil is regarded by many thousands as an indispensable of the family medicine chest.

An English gramophone company celebrating its twentieth anniversary, says that the "most popular songs" in its long list are the "old favorites" and not the new songs.

No man or woman should hobble painfully about because of corns when so certain a relief is at hand as Hollway's Corn Remover.

The middle class in society resembles the meat in a sandwich, inasmuch as it is between the upper crust and the under bread.

**The White Little Stolen Church at Windermere**

1. The church. 2. The Shalair's Canyon on Windermere Highway. 3. Bungalow camp at Windermere.

One can tell at a glance that the little church at Lake Windermere, British Columbia, has had a past—and proud of it, too! Nestled among great pine-clad ranges of mountains, on the shore of a silver lake, it is proud of its beautiful site, but prouder still to be called the "Stolen Church."

How it earned this very unique name is recalled in a recent number of "The Mentor," by Mary Graham Bonner. It is a strange story of simple, devout people who so loved their church that they stole it, and carried it away for over a hundred miles.

When the Canadian Pacific Railway moved its divisional point from Donald to Golden, the inhabitants of Donald packed up and moved. Some of them went to Golden, but a few followed the former construction engineer of Donald up the Columbia River to a place he insisted was Heaven. It was pretty near it, anyway, this Lake Windermere with

its shimmering waters reflecting the magnificent mountains. Here they settled, and built their dwellings, but in spite of the great beauty of their new home, they could not be completely happy. They missed their little church on the windy hill back at Donald. Plans had been made for the construction of a new worshiping place at Windermere, but they knew that no other church could fill the place of the old one, so dear to them, now sleeping and forsaken, in the deserted village of Donald.

Up spoke the engineer, the leader of the little colony. He knew what they could do. They would steal it. Move it away at night. Nobody wanted the little church but them; the people of Golden did not love it as they loved it.

So the church was stolen: un-ahanged, bound up and carried away one night—to Golden by train, thence on the river boat to Windermere. The steeple and the bell, however, had to be left behind, and by the

time they had returned for them, the people of Golden had wind of the affair, and they were nowhere to be found.

The bishop at New Westminster, too, learned of the theft of the Donald Church and was moved to righteous indignation. He wrote a letter to Windermere commanding the communicants to return the church, or suffer the consequences of the episcopal wrath.

But at Windermere, they were far too busy, every one of them, and too happy, to pay much attention to His Grace's admonition. Windermere has grown since the Canadian Pacific Railway ran a line through from Golden and built a bungalow camp nearby, and the automobilists pass by in their thousands from Banff and Spokane, and the communion roll of this primitive little church has swelled considerably. It has a steeple now and a bell, too, but until this day, it still proudly bears the name of the "Stolen Church."

**Here and There**

Work on the New Grand Hotel at Yokohama, Japan, started in March. Four various citizens had pleaded with the municipality for at least one good hotel for one of the main ports of their Empire. The hotel structure will be of concrete with a steel frame, and four stories in height. The estimated cost is \$1,150,000. Furnishings are expected to cost another \$350,000, bringing the total cost to \$2,000,000.

Initiative and resource shown by the Foreign Department of the Dominion Express Company went far to neutralize, if not entirely nullify, shipping troubles during the recent general strike in England. A fleet of motor trucks in London, Manchester, Bradford and Liverpool carried out receipts and deliveries in the usual manner thereby eliminating any ill effects to the British-Canadian trade during the period of the strike.

The English Football Team now touring Canada was met at Quebec, where they arrived on the Canadian Pacific liner "Empress of Scotland," by Samuel Davidson, Secretary of the Dominion Football Association. The team played the first game in Montreal and then went on to carry out the schedule at Hamilton, Toronto, Fort William, Winnipeg, Regina, Lethbridge, Calgary, Vancouver, Nanaimo, Victoria, Edmonton, Saskatoon, Timmins. The tour ends July 14.

Travelers who arrived on the "Empress of Russia" from the Far East, and who crossed Canada in order to connect with the sailing of the "Empress of France" from Quebec late in May, stated that action had been started for the stabilization of China and the end of brigand rule. Under the chairmanship of Sun Yen, son of the late president of Southern China, Dr. Sun Yat Sen, a meeting was held which may result in the coalition of all the forces of order in China.
